

ALUMINUM TERMINATION BAR

Introducing Berger's New Termination Bar

The ultimate solution for waterproofing your roof. Our Termination Bar is specifically designed to support a roofing membrane system at its termination point on vertical surfaces, effectively safeguarding against water ingress. Crafted from premium 6063-T6 extruded aluminum, Berger's Termination Bar offers unparalleled durability and reliability.

- Dimensions: 10 ft. length and 1 in. width
- Convenient packaging: Tubes of 25
- Simplified installation process: easy sealant or chalk installation, ribbed interior guarantees proper fitment, eliminates concerns of water seepage
